

MANUSCRIPT

IMPORTANT: signed IEEE copyright form must be signed and submitted to the ICT'99 Administrative POC with abstract submission.

NOTE: Materials submitted for publication will not be returned.

- The original manuscript, three photocopies, and electronic version on disk, along with your signed copyright shall be submitted at time of registration.
- Properly formatted manuscript should not exceed 4 pages for poster and oral presentations, 8 pages for invited talks and 10 pages for plenary talks
- After completing the manuscript be sure to proofread carefully. The publisher will not proof papers for typos and/or missing elements. Your paper will be printed as it is received. If the electronic version of your technical paper differs from your hard copy original, you will be asked to submit an updated diskette.
- Manuscripts are required to be submitted both as camera-ready hard copy and electronically with full text and images.
- Templates have been set up in Microsoft Word, WordPerfect, and RFT. Each template is equipped with style tags appropriate for completion of your paper. Using these style tags will conform your technical paper. To assist you, we have included downloadable templates for Microsoft Word and WordPerfect. Using the templates and adhering to the paragraph styles will enable you to create your camera-ready paper and electronic submission simultaneously. Please refer to the ICT'99 website at www.ict99.org for additional template information.
- In the event you do not have MS Word or WordPerfect, please save your paper as a *.rtf or *.txt file and designate on your disk the program used. We're sorry, but work saved in LaTeX or Unix cannot be used. If your paper contains figures, they must be saved separately on a diskette as *.tif files.
- You may compress the manuscript file by using a utility such as PKZip or WinZip, or save your work on an Iomega ZIP drive. All diskettes will remain the property of ICT'99 and will not be returned. When you have finished, return the disk with your completed paper, along with a hard copy printout, three photocopies, and your signed copyright. If you prefer to FTP your electronic version to the ICT'99 site, refer to the instructions on the Internet at:

FTP:// FTP.SAINC.COM/ICT99
- If you prefer not to use the electronic template, you may format your own paper using the formatting guidelines below. When you have finished, return your hard copy printout, four photocopies, and a disk in whatever software you prefer.

FORMAT GUIDELINES

1. Font - Times Roman (or similar)
2. Margins
For 8.5" x 11" paper set margins to
Left and right: 17.0 mm (0.67")
Top and bottom: 16.7 mm (0.66")
Two columns with 5.0 mm between
For A4 paper, set margin to:
Left and right: 13.8 mm
Top and bottom: 25.2 mm
Two columns with 5.0mm between
3. Properly formatted manuscript shall not exceed 4 pages for poster and oral presentations, 8 pages for invited talks and 10 pages for plenary talks.
4. Title – 12 pt bold, upper case and centered across full page.
5. Author Information – 10 pt, type the author(s) name(s) and affiliation(s) in upper / lower case centered across full page. Do not include author's title (i.e.; Prof., Dr.), position (president, engineer), or degrees (Ph.D., M.E.).
6. Begin double columns now
7. Section headings – 10pt bold - Initial capitalization, flush with left margin
8. Body text – 10pt, first line indentation 5 spaces
9. Abstract – The abstract will be the first paragraph in your paper. It should briefly identify the main ideas detailed in your paper. This is where the double-column format will begin.
10. Introduction – This section is used to preface your paper. It should provide background on the subject being addressed by the study.
11. Main Body – The main body of the paper is comprised of the Methods, Results and Discussion sections. The text in the main body must also follow the double-column format. Please note that figures can span two columns.
12. Conclusion – This section must be included in all papers and is a summary of what was accomplished by the study.
13. Acknowledgements - place acknowledgements here, if needed.
14. References – places any references here.

Equations - Equations can be incorporated in your technical paper in many ways. Some may be images you have scanned, some may be created with third-party equation software, some may be done with symbol fonts, and some may be done with equation editing tools of the word processor. However they are done, they should be numbered consecutively throughout the document, centered, and the equation number should be enclosed in parentheses flush to the right-hand margin.

If you physically paste equations into white space in order to create your camera-ready paper, make sure the electronic file retains the same spacing.

Photographs - All photographs submitted must be originals. Black and white photographs produce the best results. Color photographs do not reproduce well and should not be used. All photographs, figures, illustrations, tables, graphs, etc. should be pasted down within the text. The manuscripts will be printed exactly as they are received.

Tables and Figures - Tables should be captioned with a consecutive table number and title, which appear above the table (e.g. Table 1. Title). Figures should be captioned with a consecutive figure number and title, which appear below the figure, (e.g.; Figure 1. Title). The images should be submitted as separate files in *.tif format. The following naming convention should be used: E-Equation; Fig-Figure; T-Table. For example, Equation 1 should be saved as eq1.tif, Figure 1 as fig1.tif; and Table 1 as t1.tif (only if a table is submitted as a graphic).

Graphics - Note: Graphics should be linked or embedded in your document. All images must be in black and white or grayscale mode. Black and white artwork should be saved at 600 dpi as a bitmap image and saved as a *.tif file; photos and grayscale images should be saved at 300 dpi as a grayscale image and saved as a *.tif file

Footnotes and References - Citing another's work is the standard method of authenticating data, crediting another worker in the field, or guiding the reader to supplementary or collateral information. Footnotes appear at the bottom of the page on which they occur. References should be numbered consecutively and be listed in a References section at the end of the technical paper. For your text, references should be numbered in order of first appearance in the body of the paper by enclosing the reference in brackets (e.g. [1]). ISBN numbers (if known) should be included after the publisher name.

ICT'99 ADMINISTRATIVE POC

This information should provide you with all the guidelines necessary to prepare and submit your manuscript. If you have additional questions, please contact the administrative POC listed below:
